

ACETOX VR

ACETOX VR prevents oxidation and the development of microorganisms likely to produce organoleptic alteration.

INTRODUCTION

Over the years, the antiseptic effect of **ACETOX VR** allows wine to better resist the growth of microorganisms.

OENOLOGICAL PROPERTIES

Once in contact with wine, **ACETOX VR** releases 50 % of SO₂ (e.g. 100 g of product releases 50 g of SO₂).

The presence of ellagitannins reinforces the antioxidant action of SO₂ while limiting its combination.

ACETOX VR is practical and easy to use while ensuring precise dosing. Its use is particularly recommended when wines tend to combine with SO₂.

DOSAGE

Maximum legal dose: see current regulations on the maximum legal dose of total SO₂ pertaining to different types of wines (white, rosé, red, sweet wines, etc.)

INSTRUCTIONS FOR USE

Dissolve in ten times its volume of wine. Add to the total volume by pump-over or with the aid of a Venturi system.

Precautions for use:

Product for oenological and specifically professional use.

Use in accordance with current regulations.

INGREDIENTS

Potassium metabisulfite E224 (91%), ellagitannins (9%)

PACKAGING

1 kg bags - boxes of 25 x 1 kg

STORAGE

Store unopened, sealed packaging away from light in a dry, odour-free environment.

Once opened use rapidly.

Use before best-by date stamped on packaging.
