

## **CRISTALINE®**

CRISTALINE® is made from a selection of fish swim bladders.

Isinglass

Finishing glue for difficult wines

Facilitates filtration

**OENOLOGICAL GOALS** 

- Removes the finest particles in suspension.
- Clarification of difficult wines, such as those from botrytised grapes.
- Refining and finishing glue.
- Fast sedimentation once flocculation has taken place.

DOSAGE

1 to 4 g/hL.

**PACKAGING** 

Store unopened, sealed packages away from light in a dry, odour-free environment.

Do not allow to freeze.

Once opened, use up rapidly.

The information provided here is based on our current state of knowledge. This information is non-binding and without guarantee, since the conditions of use are beyond our control. ## **Pre-dilution and homogenisation**

Disperse in 50 times its weight of cold water.
Stir vigorously.
Allow to swell for some hours.

## Incorporation

Stir again, incorporating an equal quantity of cold water.

Caution: it is essential to carry out tests before using fish glue in order to assess the impact on organoleptic characteristics.

For optimum action, add SILISOL® at the end of malolactic fermentation.\*

## Precautions for use:

Avoid contact with eyes.

Product for oenological and specifically professional use.

Use in accordance with current regulations.

\*For other products, please refer directly to their technical data sheet.
