

FINING PRODUCTS

ORIGIN SH

Innovative synergistic fining product for the preservation of volatile thiols.

The information provided here is based on our current state of knowledge. This information is non-binding and without guarantee, since the conditions of use are beyond our control. It does not release the user from complying with existing legislation and safety data. This document is the property of SOFRALAB and may not be modified without its consent.

PRODUITS DE

GOOD TO KNOW!

Protection and longevity of thiols

	Sensitivity of thiols	Protection of thiols to optimise organoleptic longevity	
	→They form adducts with copper	Chelating action of PVP/PVI: elimination of heavy metals	
	→Extremely sensitive to oxidation	Chelating action of PVP/PVI: elimination of heavy metals Heavy metals are also responsible for enzymatic oxidation in musts and chemical oxidation in wines: Double protection effect	
		Presence of SIY rich in reducing elements: Protects against oxidation and limits browning	

Figure 2: Simplified diagram of the biochemical oxidation of must:

005/2023 - 2/3

Dilute **ORIGIN SH** in 10 times its weight of must, then incorporate into the must after settling. Homogenise by pumping over.

Precautions for use:

Product for oenological and specifically professional use. Use in accordance with current regulations.
