

SO.CLASSIC CE

**Varietal
expression**

***Saccharomyces
cerevisiae***

**Quick start of
alcoholic
fermentation**

OENOLOGICAL GOALS

- Very good fermentation performance
- Aromatic and gustatory clarity
- Respect for the grape variety's expression

DOSAGE

20 g/hL

PACKAGING

**500 G
10 KG**

STORAGE

Store in a cool, dry place in its original packaging.
Use immediately after opening.

FERMENTATION CHARACTERISTICS

Species	<i>Saccharomyces cerevisiae</i>
Optimum fermentation temperatures	12-32°C
Alcohol tolerance	Up to 14% vol.
Killer factor	Sensitive
Fermentation kinetics	Fast multiplication, short lag phase, medium kinetics
Volatile acidity production	Low
SO ₂ production	Low
Nitrogen requirements	Medium - high
H ₂ S production	Low
Glycerol production	Average

INSTRUCTIONS FOR USE

Disperse the active dry yeast (ADY) in 10 times its weight of a mixture of water and must in equal proportions and at a temperature of 35 to 40°C.

Example: 500 g of ADY in a mixture of 2.5 L of water and 2.5 L of must at 37°C.

Leave to stand for 20 minutes, then gently homogenise the leaven. If the difference in temperature between the leaven and the must does not exceed 10°C, incorporate the leaven directly into the must. Otherwise, double the leaven with must, wait 10 minutes, homogenise gently and incorporate into the must.

Precautions for use:

Product for oenological and specifically professional use.

Use in accordance with current regulations.
